## PROFILE

As a highly self-motivated and creative individual, I enjoy working in an environment that values innovation and excellence. A trait that I pride myself in is the ability to network with whomever and whenever. Being fluent in three languages (English, Chinese & Malay) helps me communicate efficiently and I share contacts with many high network profiles that are influential in the South East Asian and Oceania community.

I like to be involved in projects that are at the forefront of their industries as it complements my entrepreneurial characteristics. I have only been self-employed thus far but my experiences running my own startup has taught me valuable skills in utilizing the strengths of individuals and managing them accordingly.

As a blockchain enthusiast and a fund manager, I have managed portfolios that saw a ROI upwards of a 1000%. I am very keen to be a part of a movement that revolutionizes the traditional landscape of the internet by ushering this new technology.

## SKILLS

Project Management

Networking & Communication

Entrepreneurship & Creativity
